

Salsa

Flip Tables

Product Information Sheet

Symphony Persona – Our Salsa tables are functional for training, studying or eating – they fit the bill wherever flexible work surfaces are needed. And for collaboration space needs, tables can be fixed, or equipped with castors – meaning classroom or training center can be reconfigured or appear and disappear effortlessly.

Salsa Flip Tables

The **Salsa flip tables** were designed along with reconfiguration capabilities. Even with a hinged modesty panel, the tables can be nested and easily flip back to its resting position anywhere you desire. No tools are required to remove the modesty panel or engage the ganging mechanisms. All you need to do is to release the lever and the work top flips back to its nesting position. A table connector kit can also be included to fix the positions of the table arrangements.

The **Salsa metal legs** are epoxy white powder coated with castor rollers fixed that can be seamlessly integrated to create a complete environment. The **work surface table tops** are constructed with a 25mm thick melamine faced chipboard that offers a variety of finishes, while rounding off with a 2mm PVC edging.

MFC properties

Heat & Burning Resistance
Steam Resistance
Chemical or Stain Resistance
Abrasion Resistance
